# WELCOME TO LADYBIRD

## Polly

Polly

Polly's Surgery Scar

**Polly** was picked up by Hamilton Animal Services as an injured “stray.” She was taken straight to the vet, as it was clear she was in severe pain and couldn’t move her back end. Her eyes were also very red, which was likely caused by being restrained or from extreme stress. Polly was constantly crying at the vet, and would scream out in pain whenever the vet tried to examine her. Her condition was beyond heartbreaking.

The x-rays showed “a complete displaced fracture of the neck of the right ileum” which is the area of the pelvis near the hip joint. We will never know exactly what happened to cause this break, but the vet’s guess was that Polly was dropped or stepped on. It’s also likely that the break was more than a week old. Polly was put on pain meds, and stayed at the vet for her “stray time.” No owner came forward, and when HAS staff reached out to us for help, we couldn’t say no to this poor puppy.

Since being in our care, Polly has received both the overwhelming support of the community, and necessary surgery at a specialized vet to repair the fracture with the implantation of a plate. She is now recovering in the safety of her loving foster home. [Learn more...](#)

## AVAILABLE FOR ADOPTION

### Betty

It's been about a month and a half since Betty's surgery to repair a broken femur and she's finally ready for adoption. Here's a note from her foster family: *"Betty is very excited to get the all clear to be a kitten! She is now allowed to be more physically active, so she's finally getting the chance to try out all her new toys. She's a confident gal who isn't afraid to sass you when you're late for lunch – she's a big fan of meal time! Even though Betty has loads of cookoo kitten energy, she's been very gentle with her claws. She's looking for a family who'll offer her lots of playtime and a warm lap to cuddle up in afterwards."*

We thank everyone for donating and rooting for Betty!  
Look what love can do, indeed! [Learn more...](#)
